DETAILED ACTION

Remarks

1. In response to communications filed on 20 August 2008, claims 1, 6-7, 12-13, and 18 are amended. Claims 1-18 are pending in the application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Chandra et al. (US Patent 6,058,389).

As to claim 1, Chandra et al. teaches:

(a) providing one or more chosen functions in a database system, the one or more functions provided by a messaging system (see 11:45-54 and 12:61-13:12. Users may access these messaging system functions through database queries); and

(b) utilizing one or more chosen functions from the database system within structured query language statements to access the messaging system from the database system, wherein the messaging system is a separate application from the

Art Unit: 2164

database system (see 9:14-62 and 12:61-13:12. Though it is stored on the database server of a relational database system, the messaging system is a separate application from the applications that manage the database. Also see 6:29-44, where the program code for managing the database is described. It is clear that the messaging system is a different application).

As to claim 7, Chandra et al. teaches:

at least one computer processing device (see 4:18-35)

a messaging program means installed on the at least one computer processing device for performing messaging functionality (see 9:14-62); and

a database program means installed on the at least one computer processing device, the database program means utilizing one or more chosen functions of the messaging program means via structured query language statements to integrate the messaging system functionality within database functionality of the database program means, wherein the messaging program means is a separate application from the database program means (see 9:14-62, 11:45-54, and 12:61-13:12).

As to claim 13, Chandra et al. teaches:

(a) providing one or more chosen functions in a database system, the one or more functions provided by a messaging system (see 11:45-54 and 12:61-13:12); and

(b) utilizing one or more chosen functions from the database system within structured query language statements to access the messaging system from the

Art Unit: 2164

database system, wherein the messaging system is a separate application from the database system (see 9:14-62, 11:45-54, and 12:61-13:12).

As to claims 2, 8, and 14, Chandra et al. teaches wherein step (a) further comprising (a1) adding the one or more chosen functions as user-defined functions in the database system (see Chandra et al. 12:61-13:12 and 16:18-39).

As to claims 3, 9, and 15, Chandra et al. teaches wherein the user-defined functions further comprise functions to place a message on a queue of the messaging system, retrieve at least one message from the queue, non-destructively retrieve all messages from the queue, and read at least one message from the queue (see 12:61-13:12, 16:18-39, and Figure 9A, steps 900-903).

As to claims 4, 10, and 16, Chandra et al. teaches wherein the user-defined functions further specify a service endpoint (see 12:61-13:12).

As to claim 5 and 17, Chandra et al. teaches wherein the user-defined functions further specify a destination and delivery policy (see 12:61-13:12 and 16:18-39).

As to claims 6, 12, and 18, Chandra et al. teaches further comprising providing one or more chosen functions from a publish and subscribe-based messaging system

Art Unit: 2164

(see 12:61-13:12 and 16:18-39. Updates may be published and data may be retrieved from databases).

As to claim 11, Chandra et al. teaches wherein the user-defined functions further specify a delivery policy (see 12:61-13:12 and 16:18-39).

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2164

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHARLES D. ADAMS whose telephone number is (571)272-3938. The examiner can normally be reached on 8:30 AM - 5:00 PM, M - F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Rones can be reached on (571) 272-4085. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
